

# ECAMPUS TESTING REPORT

## Introduction:

Ecampus is an application system that allows a user to store a well-managed and organized set of information about student details, information, result, financial transaction meaning a set of his/her general performance and tracking.

But also, it gives a teacher flexibility to keep track of student progress information and can also assign grades and upload useful lessons or material content that may of be of great use to a child.

## Evaluation & Results:

### Admin Dashboard

Admin Dashboard in Ecampus contains variety of features which an administrator can view student, assign teachers and students classes, create lesson, holidays and view financial report.

Feature	Description	Function	Results	Recommendations
<b>Landing Homepage</b>	This is the first page that you get access to as you login to ecampus.	It is used to give access to users such as administrator, teachers and students.	Landing Homepage is fully functioning but there is a problem on the view password icon.	A view function icon that works should be implemented.
<b>Timetable Feature</b> - Create timetable	Timetable feature this is a feature that allows a user to create a timetable, to view a create time table either a student or a teacher.	It creates students and teacher's timetable.	Features in timetable are functioning except for assigned teachers do not display when you want to select a teacher for a specific class.	Assigned teachers should be visible when creating timetable so as to create timetable. But also teachers timetable should appear when assigned to classes
<b>Holiday list Feature</b>	This is feature displays list of holidays.	It is used to create holidays and display them to student and teacher dashboards.	You can successfully create a holiday but the holiday created won't be displayed on the holiday list.	Created holidays should display created holidays in the holiday list tab.

<b>Subject Lesson Feature</b> - Create Lesson - Create Topic	Subject Lesson feature is used for lesson creation and topic creation.	Creates Lesson and Topics.	When uploading files such as YouTube links and Video Upload it is successful expect for file upload it fails it requires a link for the file.	The File upload option should be fixed in a way that it does not ask for a link.
<b>Sliders Feature</b>	Sliders is a feature is used to displays slides such as images.	Displays uploaded slides.	When you upload images in a slide is functions properly but when you upload PowerPoint files it denies request	Slider feature should be able to accept PowerPoint inputs.
<b>Exams</b> - Create exams	Exam feature is a feature which allows a user to create exams, input exam marks, edit exam marks but also view student marks.	Edits, Displays, Views student exam marks but also creates exams.	When you create an exam and enroll multiple classes with that exam multiple icons of the same kind appear on the action bar.	Action bar icons should be fixed they should only appear once.
<b>Create user Feature</b>	Create user this feature gives the administrator option to enroll emails, password and delete a user.	Creates users, edits users, and enrolls a role for a user e.g., Teacher or student.	Creating User feature is function successfully but it has no style.	Style should be added to creating user page.
<b>Blank Boxes</b>	The are the box that you are suppose to check in the app.	Used to approve something or confirm it.	The blank boxes are functioning properly when you press them, they turn green and form another box inside.	The blank box respond should be changed from green to a check mark.
<b>User Profile (After you press options)</b>	These are the options that allow the user to log out, change password or update profile.	Allows user to log out, change password or update password.	The options display but in some pages, they show up cut which don't show words properly or too much on the right side making the hard to see	The options should be well fitted so as to bring a good view display order

## Student Dashboard

Student dashboard this is a students enrolled in the system dashboard which reveals accouchement information, enrolled timetable, assigned lessons and given assignments by the teacher or administrator.

Feature	Description	Function	Results	Recommendations
<b>Subject Lessons Feature</b> - Create Lesson - Create Topic	Subject Lesson feature is used for lesson creation and topic creation	Creates Lesson and Topics.	The Lesson created by the administrator do not appear on the subject lesson tab for the student user.	A system should be created to display lesson created by the administrator but also create lesson and create topic features should be removed for the student user because they are irrelevant.
<b>Student Assignment</b>	Student Assignment is used to display a students assignment given by the teacher or administrator	Displays student assignment given by teacher or administrator.	Assignments are viewable.	But the option for students to create his/her own assignment should be remove so as for it to bring meaning.

## Teacher Dashboard

Admin Dashboard in Ecampus contains variety of features which an administrator can view student, assign teachers and students classes, create lesson, holidays and view financial report.

Feature	Description	Function	Results	Recommendations
<b>Subject Lesson Feature</b>	Subject Lesson feature is used for lesson creation and topic creation.	Creates Lesson and Topics.	It does not function.	Should be fixed.
<b>Timetable Feature</b>	Timetable feature this is a feature that allows a user to create a timetable, to view a create time table either a student or a teacher.	It creates students and teacher's timetable.	It does not function except for teacher timetable.	Should be fixed.
<b>Subject Lesson Feature</b> - Create Lesson - Create Topic	Subject Lesson feature is used for lesson creation and topic creation.	Creates Lesson and Topics.	It does not function.	Should be fixed.
<b>Student Assignment</b>	Student Assignment is used to display a student assignment given by the teacher or administrator.	Displays student assignment given by teacher or administrator.	It does not function expect for assignment submission.	Should be fixed.
<b>Fees &amp; Accounting</b>	These features are used to display transactions and financial statements.	Used to view and edit financial transactions.	Don't not function.	They should be removed because they are not necessary for the teachers dashboard.

**Conclusion:**

The application is fully working and successfully progressive just minor features and tweets should be worked on so as to reach the users satisfaction.
